

## *BASIC AUDIO PRODUCTION*

Thank you for signing up for basic audio production! By the end of the 7 weeks you will have learned how to record audio, make your own melodies, and even make your very own loop or simple song. Since it is only basic audio production you may not learn everything you want however feel free to ask me any questions and I can try and cover your request in a latter class.

### ATTENDENCE

Attendance will be taken at the beginning of every class. If you come in a few minutes late please let me know so I can mark you down on the attendance sheet. It is in your benefit to be at every class, this is only a 7-week class so missing one week will put you well behind everyone else. If you have to miss class please contact me before class and explain why you couldn't make it I will do my best to help you catch up on what you missed. Please text or email me. If you choose to email please use your osu email.

Ben Mutchler – [Mutchler.44@osu.edu](mailto:Mutchler.44@osu.edu) - 419-902-6943

If you have any question after class you want answered feel free to text or email me and I will respond within 24 hours. I will also send emails weekly reminding you about what we covered in class. There will be usually be homework every week it will require to use skills learned in class.

### WEEKLY SCHEDULE

Week 1: Explain Audio Production and Introduce Mutools features.

HW: Practice navigating through Mutools.

Week 2: Explain Audio and show how to record your very own Audio in Mutools.

HW: Record Audio with a microphone.

Week 3: Explain Midi and show how to use the piano roll or a keyboard to create your own melody.

HW: Create your own melody using the piano roll.

Week 4: Explain how to use the Drum Kit and how to mix the drums properly.

HW: Create your own drum melody and set their mix levels.

Week 5: Introduce the built-in plug-ins and explain how to use them.

HW: Use plugins to one of your past projects or create a new project using plugins.

Week 6: Introduce the Audio Effects and explain how to use them.

HW: Apply Audio Effects to one of your past projects.

Week 7: Show how to put all of the previous lessons together to create your own loop or song.
